

Dear PSA Families,

We want to share with you the guidelines we will be implementing for the start of our Basketball and Volleyball season around July 1st. These guidelines have been crafted from working with other youth sport organizations and CDC guidance bulletins. Here is the season information and some of the things we will be doing to ensure protocols are in place to provide a safe environment so the kids can get back to playing the games they love.

- Starting around July 1
- Games will be during the week and weekend
- Limit the courts at each building to 3 and PSA2, McKinney and Murphy
- 5 or 6 courts at PSA1
- Use additional doors to remove congestion points
- Significantly limit or exclude (not sure yet) on spectators. Probably no siblings
- Cleaning of common equipment between games
- Cleaning of building and sanitizing seating area each night
- Separation between courts used
- Additional sanitizing stations for players in the building
- There will be no postgame handshakes or physical interaction between teams.
- Coaches should enforce social distancing while players are sitting on the bench. Extra player benches to be provided.
- No practice as the Spring season is so large, we do not have sufficient space to practice AND play games with the restrictions from Covid-19
- We are thinking about thermometer checks prior to entering the building
- More details to follow

The season will play.

Fall season will start late and we will learn from this COVID-19 season.

We are sharing the projected guidelines with you to familiarize you with the safety measures PSA will implement. Governor Abbott will be keeping us up to date with any changes or new guidelines in the coming weeks and we will adhere to what is recommended or ordered.

GAME ON!!!!
